

ENVIRONMENTAL POLICY OF RAMON CLEMENTE S.A.

RAMON CLEMENTE S.A. is aware of the impact of its activities on the environment and, to this end, is committed to carrying them out in accordance with the following basic principles, responding to the requirements of UNE-EN ISO 14001:2015:

- **To adopt environmental protection**, including pollution prevention, as a commitment of our organization, ensuring that it is carried out through specific objectives and goals in all functions and areas of the company's activities.
- **To comply with applicable legislation and other regulations**, as well as other voluntarily accepted requirements, related to our activities, products, and services.
- **To implement an Environmental Management System** and keep it up to date according to a process of continuous improvement in environmental performance. We periodically review the environmental protection status in our company to identify and manage risks and opportunities, both internal and external, and to take the necessary actions for their proper treatment, documenting the progress made.
- **To establish operational procedures to ensure management focused on minimizing our environmental aspects** (waste, emissions, discharges, among others), and when this is not possible, define control methods that ensure a lower environmental impact.
- **To promote an environmental culture** among all staff, fostering a genuine commitment to the environment, making the corporate concern of all employees a reality.
- **To raise awareness about the environment** among customers, suppliers, and the general public.
- **To openly communicate our environmental policy**, conveying our environmental philosophy both internally and externally.

To achieve the mentioned principles, top management provides the necessary resources to maintain and develop the Environmental Management System and ensure the application of the Environmental Policy across all areas of RAMON CLEMENTE S.A.
